INTERNSHIPS AND PROJECTS

06/2025 – 06/2025	**Typing Speed and Accuracy Test** A web-based tool that measures a user's typing speed (WPM) and accuracy in real-time by comparing input against a randomly selected quote. Built using HTML, CSS, and JavaScript, it features dynamic timer updates, real-time performance tracking, and a clean user interface with start, stop, and reset controls. Skills used - HTML CSS JavaScript
05/2025 – 05/2025	**Dual-Mode Calculator (Scientific + Standard)** Developed a responsive and interactive web-based calculator supporting both standard and scientific operations. Implemented keyboard support, theme toggling, and a history panel to enhance user experience and functionality. Skills used - HTML, CSS, JavaScript

Certificates

Web Development for Beginners ⊠

An introductory course covering the fundamentals of web development, including HTML, CSS, and JavaScript. Designed to help beginners build responsive and interactive websites from scratch

DSA

An in-depth course on Data Structures and Algorithms covering essential topics like arrays, trees, recursion, and dynamic programming to strengthen problem-solving and coding interview skills.
